\*Note: amounts are only approximate, based on average size projects, and will vary depending on type of stitch, gauge and differences in individual knitters and crocheters. To find out how many skeins/balls/cones to purchase, divide the total yardage needed by the chosen yarn's amount per skein/ball/cone. Be sure to round up to the nearest whole skein/ball/cone. For example, to make an adult afghan out of Homespun, you will need 1875 yards of yarn. Each skein of Homespun contains 185 yards, so you will need 11 skeins of yarn.
